PRESS RELEASE

Name and trading symbol change

Brussels, August 29th, 2012 (7:00 am) – Following the Board of Directors held on January 19, 2012, United Anodisers changed its name to "COIL". According to a notice published by NYSE Euronext, the title also responds on behalf of COIL as of August 29, 2012.

COIL name must consolidate the Group's image by enhancing its recognition by economic partners and financial market.

The ISIN code is unchanged and remains: BE0160342011

The mnemonic (Euronext) now reads: ALCOI.

COIL is the world's largest architectural and industrial anodiser.

Anodising is an electrochemical process - electrolysis - that develops a natural and protective exterior layer on aluminium that can be coloured, providing exceptional corrosion protection and/or increased functionality for the metal.

Anodising preserves all the natural and ecological properties of aluminium - it retains its high strength-to-weight ratio, non-magnetic properties and exceptional corrosion resistance without any impact on the total and repeated recyclability of the metal.

Anodised aluminium is used across a wide range of architectural, designer, industrial and automotive applications.
